Kudus, Jawa Tengah (59372)

I am a Full Stack Developer and Business System Analyst with a background in Informatics Engineering, experienced in building structured web systems and analyzing business processes to support operational needs. I focus on developing RESTful APIs, designing relational databases, and implementing interfaces using JavaScript/TypeScript and PHP. With an analytical mindset, I bridge technical development and business requirements to deliver efficient and scalable solutions.

## WORK EXPERIENCE

---

### Full Stack Developer, PT. Kanindo Makmur Jaya August 2025 – Present

- Develop and maintain internal web applications with 400+ active users and build ERP-based operational support systems.
- Contribute to web system development, including RESTful API implementation, relational database design, and performance optimization to ensure system stability and scalability.

### Full Stack Developer, Freelance May 2024 – Present

- Develop various web applications using PHP (Laravel, CodeIgniter), JavaScript, and React, integrating RESTful APIs for frontend-backend communication.

### Teaching Assistant, Muria Kudus University August 2023 – July 2024

- Guided students in Network Programming and Database System labs, assisting with evaluation and lab management.
- Contributed to the preparation of lab modules and troubleshooting technical issues during sessions.

### Full Stack Developer Intern, PT Humanika Mitra Solusi January 2024 – February 2024

- Independently developed a digital cashier system (E-Cafe) from database design, backend implementation, to user interface development.

### Network Administrator, RT/RW Net February 2021 – May 2022

- Built and managed network infrastructure based on MikroTik, including wireless and fiber optic installation.
- Expanded the network from 1 client to 120 active clients within one year of operation.

## EDUCATION

---

### Bachelor of Informatics Engineering, Muria Kudus University August 2021 – January 2025

- GPA: 3,85/4.00 (144 SKS)

### Computer and Network Engineering – SMKN 3 Kudus July 2018 – June 2021

- Final Score: 86,07/100

## PROJECT

---

### Payroll and Attendance Management System (Thesis Project) October 2024 – January 2025

- Designed and developed a role-based payroll and attendance system with features including location-based attendance, schedule management, leave and overtime tracking, and reporting.
- Built using Next.js (frontend) and Express.js with layered architecture, PostgreSQL database, JWT authentication, Zustand state management, and RESTful API integration.
- Implemented Google Maps for location tracking and Cloudinary for media management with structured and scalable database and API design.

### Sports Court Booking System (Freelance Project) May 2025 – July 2025

- Developed a web-based sports court booking system using Laravel, MySQL, and Bootstrap, featuring court management, reservation, payment, and review modules.
- Implemented automated order expiration and WhatsApp review notification using Laravel Scheduler to improve operational efficiency.

- Designed database structure and system architecture covering multi-role access (Admin & User), transaction flow, and financial reporting

#### **E-Cafe (Intern Project)**

**January 2024 – February 2024**

- Developed a web-based cashier system using Laravel 8 and Bootstrap 5 with inventory management, order processing, and reporting features.
- Designed database structure and backend logic to ensure data consistency and operational efficiency.

### **TECHNICAL SKILLS**

---

|                                |                                                                                                           |
|--------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Backend</b>                 | : PHP (Laravel, CodeIgniter), Node.js, NestJS, Express.js, RESTful API                                    |
| <b>Frontend</b>                | : JavaScript/TypeScript (React.js, Next.js), Tailwind CSS, Bootstrap                                      |
| <b>Database</b>                | : MySQL, SQL Server, PostgreSQL                                                                           |
| <b>DevOps &amp; Tools</b>      | : Docker, CI/CD, Notion, GitHub                                                                           |
| <b>Networking</b>              | : MikroTik, Network Infrastructure                                                                        |
| <b>Business &amp; Analysis</b> | : Business Analysis, System Integration, Requirements Gathering, ERD, API Design, Technical Documentation |

### **PROFESSIONAL SKILLS**

---

|                    |                                                                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Core Skills</b> | : Problem Solving, Analytical Thinking, Leadership, Initiative, Cross-Functional Collaboration, Technical Communication, Time Management, Finance & Business Knowledge |
| <b>Languages</b>   | : Bahasa Indonesia (Native), English (Intermediate)                                                                                                                    |
